## Acknowledgements

The Bakersfield-Kern Regional Homeless Collaborative (BKRHC) Point in Time (PIT) Count Committee would like to thank all the individuals and partner agencies who contributed to this endeavor and whose efforts were instrumental in the success of the count. Over 462 volunteers registered to participate in the 2023 PIT Count with 312 individuals assigned to survey teams and headquarters support staff. Employees from the County of Kern, City of Bakersfield, homeless service providers, and community organizations gave their time with several aspects of planning, implementing, and conducting the count.

A huge thank you to Adventist Health for their sponsorship of this year's event and for their volunteer contributions. Thank you to the Mission at Kern for providing logistics space for the PIT Count, to the PIT Committee members and committee chair Manuel Vieyra (Flood Ministries) for providing leadership and guidance in planning for such a huge undertaking, to partners with lived experience of homelessness for gifting us with insight where it was needed, and to the BKRHC staff for their commitment and support to the work.

Thank you to Suzanne Baehr and the amazing Kern County GIS team for supporting the survey app work and data needs of the PIT Count volunteers. Thank you to City and County partners in government, code enforcement, fire/emergency services, law enforcement, parks and recreation, human services, public works, and aging and adult services for helping navigate through the work.

A special thank you to the private citizens and volunteers of Kern County who took part in the count and showed that, through collaboration, we can complete extraordinary work.

Thank you to all the participating organizations who provided their time, energy, and support to the Kern County 2023 PIT Count, including volunteers from:

Adventist Health • All of Us or None • Alpha Omega Wellness Center • Amazon • American General Media • American Kids Sports Center • Aspiranet • Bakersfield College • Bakersfield Recovery Services, Inc • Bakersfield Rehab Center • BARC • Bitwise Industries • Boys and Girls Club • BroidaCo Auto Sales • Cal – Student Opportunity and Access Program (SOAP) • California State University Bakersfield • California Veterans Assistance Foundation • Casa Esperanza • Chevron • City of Bakersfield • City of Ridgecrest • CityServe • Clemmer & Company • Clifford and Bradford • Clinica Sierra Vista • Com Plus Inc • Community Action Partnership of Kern • Community College Services • Community Water Center • Correctional Kern Behavioral • County of Kern • Cushman & Wakefield • Dagny's Coffee • Department of Corrections • Department of Veterans Affairs •

## Kern County 2023 PIT Count Summary

The 2023 Point-in-Time Count was an endeavor taken on by a dedicated group of individuals and volunteers through a community-wide effort to cover Kern County. The count conducted from January 24<sup>th</sup> through 27<sup>th</sup> comprised a single night shelter count and a three day unsheltered count.

### 2020 – 2023 HOMELESS POPULATION COUNTS\*

\*2021 PIT Count was not conducted in person due to COVID, HMIS data used.

## Introduction

The United States Department of Housing and Urban Development (HUD) defines homelessness as individuals who lack resources and support networks to obtain permanent housing and can be categorized as those who are literally homeless, imminently homeless, unaccompanied youth or families with children/youth, and individuals or families fleeing or attempting to flee various forms of violence such as domestic violence, dating violence, stalking, sexual assault, or other life threatening conditions.

The nationally conducted PIT Count is an annual snapshot of sheltered and unsheltered individuals experiencing homelessness within a geographic area. Specifically, Kern County covers over 8,100 square miles with a variety of ecosystems ranging from high deserts, chaparral-laden mountains, and fertile agricultural land within the valley.

Although HUD requires Continuums of Care (CoC) to conduct counts biennially, the Bakersfield-Kern Regional Homeless Collaborative completes an annual count to identify changes within the homeless delivery system and understand the needs within the community.

## Methodology

The 2023 PIT count utilized a HUD-approved methodology for conducting the count of individuals experiencing homelessness in Kern County. Typically, the PIT count occurs over a 12-hour time period. The shelter count was completed using a survey hosted within the ArcGIS Survey 123 application, a geographic information system that works by collecting data via survey administration, and occurred on the night of Tuesday, January 24, 2023. The unsheltered count was completed the following morning on Wednesday, January 25, 2023 utilizing the unsheltered version of the ArcGIS survey application, however that morning's count was decreased by one hour overall due to a later start time.

For the unsheltered PIT count, the BKRHC PIT Committee and Governing Board approved the addition of two extra days to continue the count for encampment areas along the Kern River and rural areas. The methodology change, allowable by guidance provided by HUD, included several required contingencies to ensure surveys were not duplicated on individuals already surveyed on prior days. These measures included comparison of personally identifiable information including name or date of birth and survey screening questions (e.g., have you already been surveyed).

The PIT count utilizes an in-person interview of individuals experiencing homelessness throughout Kern County. For those individuals who were not able to complete a survey or in situations where it was impossible or unsafe for a volunteer to survey an individual, an observational survey was completed. For instances where demographic (gender, race, ethnicity) data could not be collected, the HUD data extrapolation tool was used to obtain missing data

extrapolated from data that was present. Data underwent a thorough process that included scrubbing/cleaning, deduplication, error-checking within the extrapolation tool, analysis, post analysis review, and entry into HUD's reporting system, which also conducts automated, real-time error tracking. Any errors caught in HUD's reporting system were corrected before the data submission could be completed.

Even prior to official submission to HUD, the data and report are reviewed and approved within the CoC's Governing and Executive Boards.

### Current and Comparative Data

During the 2023 PIT Count a total of 1948 individuals were counted, 931 comprised sheltered individuals and 1017 comprised unsheltered individuals. This is a 22% increase in the total number of individuals when compared to the 2022 PIT Count (1603 individuals).

Sheltered and unsheltered counts both trended upward with an increase of 6% and 40% respectively.

When not considering the additional two days of this year's unsheltered count, the single day 2023 unsheltered count included 825 individuals. Comparing single day unsheltered counts from 2022 (728 individuals) and 2023 results in only a 13% increase in unsheltered individuals. This is important to note as the additional two days of the 2023 unsheltered count added nearly a 25% increase in surveys conducted.

Figure 1. Total homeless population by PIT year.

Figure 2. Comparison of sheltered (blue) and unsheltered (green) populations by PIT year.

More sheltered individuals utilized Emergency Shelter programs versus Transitional Housing programs during the night of the 2023 shelter count.

**Shelter and unshelterd breakdown by program type.**

Figure 3. Shelter program and unsheltered utilization percentages.

## Key Findings

### *Population Demographics*

#### **Age**

Children (under 18 years) and youth (aged 18 – 24) comprised 6.42% and 6.16% of the total sheltered and unsheltered homeless populations respectively, while adults (aged 25 and older) comprised the remaining 87.42% of the population. Specifically, nearly half of the entire homeless population consisted of adults between the ages of 25 – 44 and 5.24% of individuals experiencing sheltered or unsheltered homelessness were considered elderly (102 individuals aged 65 or older).

Figure 4. Age Range Distribution for Homeless Population

### Gender

As in previous years, males made up 67.2% of the homeless population. Females accounted for 32.3% of the total population, while individuals identifying as no one specific gender represented 0.4% and transgender individuals comprised the remaining 0.1% of the population.

Figure 5. Gender Distribution of Homeless Population

### Ethnicity

There was no change from last year and this year's percentages of individuals experiencing sheltered and unsheltered homelessness who also identified as Hispanic or Latin(a)(o)(x) with 40.6% of the total population representing that ethnic identity (see Table 1).

### Race

Individuals who identified as American Indian/Alaska Native/Indigenous, Asian/Asian American, Native Hawaiian/Pacific Islander, or multiracial represented similar percentages as in the previous PIT count year (see Table 1).

There was a noticeable decrease in the number of individuals that identified as Black, African American, or African from 20% in 2022 to 15.8% in the current PIT count with increased shelter utilization when compared to their unsheltered counterparts.

The opposite trend was noticed with individuals who identified as White, with an increase from 71% in 2022 to 77.2% in 2023 and more individuals experiencing unsheltered homelessness than staying in shelters. It is important to note that identification of White in the homeless population data does not necessarily constitute an individual identifying as Caucasian, rather it could mean that an individual identifies as Hispanic/Latin(a)(o)(x) and White or non-Hispanic/Latin(a)(o)(x) and White. This detail is critical as data from the latest United States census has Kern County's Hispanic population at 56.1% and White alone/not Hispanic population at 31.1%.

Table 1. Age Breakdown Among Sheltered and Unsheltered Homeless Population.

| Ethnicity & Race                              | Sheltered | Unsheltered | All People |
|---|-----------|-------------|------------|
| <b>Ethnicity</b>                              |           |             |            |
| Non-Hispanic/Non-Latin(a)(o)(x)               | 62.5%     | 56.5%       | 59.4%      |
| Hispanic/Latin(a)(o)(x)                       | 37.5%     | 43.5%       | 40.6%      |
| <b>Race</b>                                   |           |             |            |
| American Indian, Alaska Native, or Indigenous | 2.1%      | 1.6%        | 1.8%       |
| Asian or Asian American                       | 0.9%      | 0.4%        | 0.6%       |
| Black, African American, or African           | 20.3%     | 11.5%       | 15.8%      |
| Native Hawaiian or Pacific Islander           | 0.6%      | 0.7%        | 0.6%       |
| White   | 72.5%     | 81.4%       | 77.2%      |
| Multiple Races                                | 3.6%      | 4.4%        | 4.0%       |

#### *Living Accommodations and Duration for Unsheltered Homeless Population*

The majority of unsheltered individuals that provided a response to their current living situation resulted in an overwhelming majority living outdoors, typically in places not meant for human habitation which can include tents or other makeshift structures. Unsheltered individuals encountered during the PIT count were also currently living in abandoned buildings, cars, or garages.

Figure 6. Current living situation for unsheltered individuals.

There were 253 individuals experiencing unsheltered homelessness who reported this was their first episode of homelessness. As for length of current episode for unsheltered homelessness, those who have been homeless for a year or more had the highest count.

Figure 7. Length of current episode of unsheltered homelessness.

### *Perceived Causes of Unsheltered Homelessness*

Data on perceived causes of homelessness was collected from 513 unsheltered respondents who provided a response to this survey question. The top three perceived causes were other homeless issues (99), addiction or substance abuse (89), and household issues (81). For other homeless issues, these ranged from health issues such as COVID or underlying health conditions, pets, relationships, and lack of systems navigation.

### *Health and Unsheltered Homelessness*

There was a total of 183 self-reported health conditions for the unsheltered population that ranged from a single disease or morbidity to as high as 6 co-morbidities. These diseases include asthma, diabetes, heart disease, hepatitis C, HIV/AIDS, tuberculosis, and valley fever.

Table 2. Morbidity and Co-Morbidity within the Unsheltered Homeless Population.

| Number of Self-Reported Diseases (Morbidity) | Count of Individuals |
|--|----------------------|
| 1  | 74                   |
| 2  | 80                   |
| 3  | 14                   |
| 4  | 14                   |
| 6  | 1                    |

Additionally, health insurance data was included as part of the survey questions for this year's PIT count. There were 851 individuals that provided an insurance response when asked. The intersection between healthcare and homelessness has been a recent focus and a better understanding of an individual's insurance availability and their access to quality healthcare can be gleaned from the data. This information can enable better coordination of services between healthcare providers and homeless services organizations.

Table 3. Insurance Among the Unsheltered Homeless Population.

| Insurance Type            |     |                         |     |
|---------------------------|-----|-------------------------|-----|
| Employer health insurance | 1   | State health insurance  | 5   |
| Medi-Cal                  | 302 | Veterans administration | 5   |
| Medicare                  | 23  | Other                   | 13  |
| Don't Know                | 323 | No Insurance            | 179 |

### *Special Populations of Interest*

Three particular populations of interest within the overall homeless population include individuals who are chronically homeless, those with military service, and individuals aged between 18 – 24 years (youth). The count for these populations is listed below.

Table 4. Count of Homeless Populations of Interest.

| Homeless Populations of Interest | Sheltered | Unsheltered |
|----------------------------------|-----------|-------------|
| Chronically homeless             | 254       | 251         |
| Veterans                         | 59        | 33          |
| Youth                            | 71        | 49          |

### *Additional Homeless Populations*

Other populations of focus for individuals experiencing homelessness include those with self-reported mental illness, substance abuse, HIV/AIDS, and those who identify as survivors of domestic violence (see Table 5).

### **Mental Illness**

There was a total of 530 adults who self-reported a serious mental illness. More sheltered individuals reported a serious mental illness than their unsheltered counterparts.

### Substance Use Disorder

382 individuals in the homeless population self-reported a substance use disorder with the majority also being sheltered. Substance use disorders range from alcohol, drug, or alcohol and drug use.

### HIV/AIDS

The majority of individuals who self-reported living with HIV/AIDS were also experiencing unsheltered homelessness with 17 respondents.

### Domestic Violence Survivors

There were more sheltered individuals who identified as survivors of domestic violence than those that were unsheltered, 52 to 6 individuals, respectively.

Table 5. Count of Additional Homeless Populations.

| Additional Homeless Populations      | Sheltered | Unsheltered |
|--------------------------------------|-----------|-------------|
| Adults with a serious mental illness | 343       | 187         |
| Adults with a substance use disorder | 220       | 162         |
| Adults with HIV/AIDS                 | 5         | 17          |
| Adult survivors of domestic violence | 52        | 6           |

### *Unsheltered Population Distribution for Kern County*

Density maps provide an overall view of the homeless population spread throughout Kern County and within metropolitan areas. Additionally, count totals are divided up by City. Please see Appendix B for additional information.

### Conclusion

Homelessness is solvable in Kern County and efforts are being made to reduce the number of individuals experiencing homelessness at any given time. While the overall number of homeless individuals rose for the 2023 PIT count, consideration should be given to the additional two days of the survey count. Through collaborative efforts, Kern County can come together to accomplish amazing work.

## Appendix A: Definitions

### **Adult**

An individual who is aged 25 and older.

### **Bakersfield-Kern Regional Homeless Collaborative (BKRHC)**

The primary entity charged with responsibility for overseeing CoC functions as mandated by HUD, including submission of the annual CoC Notice of Funding Opportunity (NOFO), HMIS oversight, Point In Time Count, Housing Inventory Count, as well as other annual reports.

### **Chronically Homeless Individual**

An individual or family head of household with one or more disabling conditions who has been continuously homeless for 1 or more years and/or experienced 4 or more episodes of homelessness within the last 3 years.

### **Families**

A household that consists of at least one adult who is 18 years of age or older and at least one child who is under 18 years of age.

### **Housing and Urban Development (HUD)**

The U.S. Department that funds low-income and affordable housing initiatives, including the McKinney-Vento Homeless Assistance Act, through the HUD Continuum of Care Program and Emergency Solutions Grant Program.

### **Point In Time (PIT) Count**

The Point-in-Time (PIT) count is a count of sheltered and unsheltered people experiencing homelessness on a single night in January.

### **Sheltered Homelessness**

A state of homelessness where an individual is currently residing in an emergency shelter, navigation center, or transitional housing.

### **Unsheltered Homelessness**

A state of homelessness where an individual is currently residing in a place not meant for human habitation including abandoned buildings, vehicles, park benches, sidewalks, or encampments.

### **Unaccompanied Youth**

Youth under the age of 18 and individuals between 18 through 24 years of age experiencing homelessness and without a parent or legal guardian.

### **Veteran**

An individual who has served on active duty in the Armed Forces of the United States.
